SocraDispo

Order Management and Communication with the Driver by Smart Phone or Tablet-PC

The telematic solution SocraDispo offers to send individual orders or complete tours to a vehicle. The driver is able to send back the status to a dispatcher. This is the solution for all companies which need transparent supply chain structures

Features

GPS-Positioning:

- Actual position of your vehicles on an electronic map
- Detailed tour history as map and table view
- Detailed electronic logbook (including speed information) for each vehicle
- Downtime report based on an adress database
- Geofencing based on an adress database
- Alarm messages by SMS or e-mail based on geofences, digital inputs, battery alarm, start, stop, drive message
- Overspeed alarm on map, by SMS and email

Order Management:

- Transmission of individual orders or complete tours with loading/unloading information
- Status message transmission from driver to dispatcher
- Integrated navigation (truck-navigation)
- Message transmission including allocation of loading/unloading adresses
- Driver registration

Other:

- Integration in the logistic software system of the customer via various interfaces (csv, ftp, web-service etc.)
- Transmission of pictures

Operation Systems

- Android-devices
- iOS-devices

Manage orders easily by smart phone
